

Vaccination Schedule for your puppy

6 Weeks we give DHPP (Distemper) & wormer

Puppy's Age	Recommended Vaccinations
8-9 weeks	DHPP (Distemper) Fecal Tests
12 to 13 weeks	DHPP (Distemper) Start Heartworm prevention
16 weeks	DHPP (Distemper), Rabies 1 year
16 months	Rabies, DHPP (Distemper)

Heartworm: a mosquito transfers the worm larvae from an infected dog to other dogs.

Heartworm tests:

4DX snap test: tests for Heartworm, Lyme disease, Anaplasmosis, Ehrilichiosis &

Basic Heartworm test that just checks for Heartworm.

AFTER THE PUPPY

IS A 1YEAR OLD

Annually

1 or 3 year
vaccination

DHPP=

DHPP (Distemper)

Rabies (**required by law**)

Distemper, Hepatitis(Canine),
Parvo,
Parainfluenza

The prevention:

Heartworm pills (Iverheart, Heart guard) which is given monthly, or a proheart injection that last 6 months. These preventives also prevent roundworms, hookworms and tapeworms!!!!!!

Optional Vaccinations

Bordatella – Recommended prior to boarding your pet, grooming, or even dog training (puppy classes)

Lyme – Is a 2 series vaccination (1st time canine needs booster; after that it is annually) to protect your canine from deer ticks or black – legged ticks.

Vaccinate and have a healthy happy pet
